SHIV TRADERS INSTRUMENTS PVT. LTD.

A Hygienic and powerful supportive equipment for removing air bubbles from the milk samples, before analysis. It is cost effective and easy method that facilitates industries grade non-interrupted operations.

Function/Features

- Soft start
- LED Display
- Push Button Operational control
- Minimum time setting : 10 secs
- Maximum time setting : 60 secs
- Time increment steps : 01 sec
- Time display 2 nos. 7 segment LED display
- Input voltage : 170 to 290 AC volt.
- Input voltage : 10.5 to 16 volts DC (upto 30 volts DC)

Technical Specifications :

Input voltage : 170 to 290 AC volt.

Input Frequency : 45 to 55 Hz.

Input power : 32 VA max.

Available In :

- Stainless Steel (304)
- MS Powder Coated

DC Operations :

Input voltage : 10.5 to 16 DC volt.

Input current : 22 amps max.

Reversed Battery protection
