to Dawn

General Specifications :

- This device is a Digital PWM solar charge-discharge controller.
- Built-in industrial grade intelligent micro-controller.
- Three stage PWM charge management system.
- 12V / 24V Solar panel system regulator with efficient battery charge management.
- Supports Li-ion, Li-phosphate, Led-acid, AGM, GEL batteries.
- LCD display for status monitoring.
Front Panel switches for parameter settings.
- Built in Short circuit, Reverse and Overload and Heat protections.
- 5V / 2A built in USB port for charging Mobile, Laptop, PC etc.
- Operating Temperature - 0 To 60°C.
- Relative Humidity (RH) - 85% (Non condense).

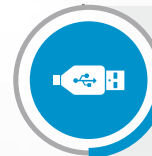

Increase Battery life
/Gravity Builder

- Designed to remove sulphate build up
- A high equalizing charged battery

Automated Voltage Selection

- Auto battery selection upto 20A
Settable Battery selection for 50A

USB Port

- For 20A plug in your DC devices
such as fans, lights, mobile phones
etc.

Protections

- In-built short circuit, reverse
current & polarity Protection
- No risk of electric shocks
